

RightStar offers training for both the end user and the administrator at any level, beginner, intermediate, or advanced. Each of the training courses are instructor-led and are delivered either on-site in a physical classroom, or via a virtual classroom using WebEx. Students are provided with all materials, including a hands-on training environment and hard-copy training manual.

Both Beginners and Advanced training classes are available for the following Atlassian software:

- JIRA
- JIRA Service Desk
- JIRA Portfolio
- Confluence
- JIRA/GIT
- FishEye/Crucible
- GIT

RightStar can also deliver bespoke training on any combination of the Atlassian tools, custom designed around your specific needs.

Contact RightStar to request a comprehensive training syllabus and pricing or to discuss requirements for bespoke training.
